

SKILLS Python, JavaScript, React, Git, Redux, Flask, SQL, OOP, Express, Postgres, Docker, AWS, Google Maps React, HTML, CSS

PROJECTS

SoundCloud Clone | *(React/Redux, JavaScript, Express, SQL, AWS)*

[live](#) | [github](#)

- Built user scopes in database models to allow only intended information to be accessible when particular actions are performed.
- Integrated a React Player for the artist to interact and listen to selected material using a global redux store.
- Ensured artist authorization with the implementation of user authentication checking validation against backend set user authentication only allowing rendering the option to update/delete if it validates.

Instagram Clone | *(React/Redux, Python, JavaScript, SQLAlchemy, Flask, Docker, AWS)*

[live](#) | [github](#)

- Designed complex React components for astounding user design and interface and allowing dynamic content change on user interaction via comments/likes/following.
- Incorporated AWS for a complete experience allowing a user to upload an image from their local machine to be stored on the application database when creating a post.
- Implemented complex database tables and association, using one-to-many as well as many-to-many polymorphic tables to friend other users while maintaining reduced time-complexity.

Aktiv (Strava Clone) | *(React/Redux, Python, JavaScript, SQLAlchemy, Flask, Docker, AWS, Google Maps)*

[live](#) | [github](#)

- Utilized list and dictionary comprehension for ease of use on individual backend routes for easily accessible associated models/tables.
- Integrated Google Maps React to mark a user's created route all while on creation it dynamically sets a user's distance and route using DirectionsServices and DirectionsRenderer.
- Constructed multiple unique instance methods on each route for optimized data manipulation for jsonable information to utilize on the frontend of the application.

EXPERIENCE

Assistant Service Manager / Service Advisor

Larry H Miller Honda DownTown Spokane

Sept 2019 - Dec 2022

- Managed workflow in a high paced environment with spur of the moment deadlines and supplying working hours for a team of service technicians.
- Provided a consistent enjoyable customer and team experience. Lessened customer disconnect by providing a bridge, in terms of knowledge, to help customers understand vehicle needs and build trust.
- Oversaw most if not all training and technical questions for the service drive. Built lifelong customers through the ability to serve customer needs all while setting myself apart as consistently a top service advisor every month.

Service Advisor / Technician

Autonation

Sept 2012 - Sep 2019

- Achieved the most profitable service advisor each month and built a culture of customer care to improve productivity and customer satisfaction.
- Outpaced fellow colleagues not only in my store but in the region and spearheaded that in the entirety of my tenure with this store.
- Diagnosed and repaired vehicles with particular issues as well as performed regular maintenance. Performed this earlier on in my tenure to kickstart my career.

EDUCATION

AppAcademy

2021-2023

- Rigorous 1000-hr full-stack web course that teaches OOP, SCRUM, TDD, REST, pair-programming, security, authentication. With <3% acceptance rate.
